We are working with them and they are working with us on the presumption that we will be able to reach an agreement and enter into a contract which will be brought to the council at the appropriate time. I would be happy to update you and the council at our upcoming work session

>>>>>> For the past couple of months the city has been working on a public/ private partnership concerning the use of effluent water. We were able to secure a right away for Highway 128 from the New Mexico Department of transportation for 21 miles. We secured this permit within two weeks of submitting our application. Our plan also included utilizing 2 miles of right away on County Road 2, we had to abandon those plans after the county continued to delay and not respond to our request, without providing a reason, for over a month.

>>>>>>

>>>>> This morning the contractors who are working on the lines and right away were working on north 3rd Street. Former county commissioner Greg Fulfer stopped their work and demanded to see a county permit that allowed them to work on the right-of-way and bore under the road. They provided Mr. Fulfer with the explanation they were given by us, he apparently did not like that and began taking pictures. He obviously then called you and you responded by calling our public works director and wanting to know where the permit was for the work along this right away on 3rd Street. Van explained that an application for the permit was sent to the county several weeks ago along with a map and the coordinates of the exact location of the project. We received a written documentation back from the county stating that the city would be the responsible entity for any right away permits for this section of 3rd Street.

>>>>>

>>>>> Please except his communication as notification that any further communication regarding this project between the county and the city should be sent directly to me. This project has now been stopped and harassed by the county on to locations, and for what reason, someone else will have to provide that answer.
